

Benefits of greener homes

An energy-efficient green home can use up to **66%** less electricity, **51%** less water and produces **62%** fewer greenhouse gas emissions than the average Australian home.

Australia is one of the highest producers of carbon emissions per capita in the G20 group of nations.

3.2m
rooftop solar homes
Australia leads the world in rooftop solar.

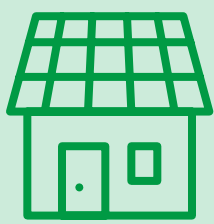

Solar water systems use **60-70%** less energy than a conventional electric system.

LEDs last **5-10** times longer than a traditional halogen light bulb.

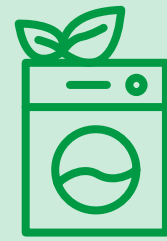

Save between **45-55%** on heating and cooling costs in homes with effective insulation.

Lighter coloured roofs reduce indoor temperatures, reducing cooling costs.

5-10%
Increased property value of energy efficient homes.

Energy efficient appliances can reduce energy bills.

You could save on Lenders Mortgage Insurance if you take out a green mortgage. Talk to one of our participating exclusive partners to see how much you could save.*
