

# Cyber Services

## Thoughtful solutions powered by real people

**Cyber risks present diverse challenges for organisations. The QBE Global Cyber Services Team offers a range of solutions that enhance incident preparedness, improve insurance outcomes and cost effectively strengthen organisational resilience - getting to the heart of what's at risk.**

The following services are included as part of our cyber insurance offering for New Zealand customers

### QCyberPrepare

QCyberPrepare (powered by CYGNVS) is a secure cyber incident communication and document storage platform, allowing you to access key documents and communicate across the organisation during a cyber incident when your key systems may be unavailable. Using QCyberPrepare provides confidence to organisations before, during and after a cyber incident.

### Sample Incident Response Plan

An Incident Response Plan is a core part of an effective cyber risk management strategy. QBE can provide a sample Incident Response Plan that can provide insights into preparing for, managing and recovering from a cyber incident.

### Threat Intelligence Webinars

Staying up to date with emerging cyber risk trends allows organisations to proactively address emerging threats and understand the fast-evolving threat landscape. QBE experts provide quarterly webinars highlighting threat intelligence and claims trends, industry specific threat intelligence insights and helpful analysis for leadership, technical or risk management teams.
