

Tailored Tabletop exercises

Strengthening organisational cyber resilience

In the fast-evolving cyber risk landscape key risks and insurance goals must be proactively managed across leadership, technical and operational teams. QBE tailored tabletop exercises are designed to expand organisational awareness of key cyber risks, improve cyber insurance outcomes and bolster cyber risk resilience

QBE's tailored tabletop exercises are developed in consultation with organisations to ensure that key cyber risk priorities are considered and improved. Exercises are delivered virtually and take participants through a simulated cyber incident, focusing on the financial, operational, technical and reputational impacts that can impact core business objectives.

The focus of this exercise is to strengthen understanding of the practical steps organisations can take to effectively manage a cyber incident – from initial notification to full restoration – and can be tailored and delivered to a leadership, technical or operational audience.

The development and delivery of the exercise includes the following steps:

- Scoping call to identify key priorities, timeline and participants from organisation
- 1-2 stakeholder interviews to ensure the exercise takes into account key operations and is tailored to organisational needs
- Development and virtual delivery of a 2-hour tailored cyber incident tabletop exercise focusing on the operational, financial, insurance, technical and business impacts of a cyber incident
- 60-minute post exercise discussion providing high level observations and recommendations

Opportunity

Tabletop exercises are available to all QBE Primary Cyber insurance customers paying USD 100K+ in premium.
