

Partnering for resilient construction in Asia

Empowering progress through protection,
insights, and partnership.

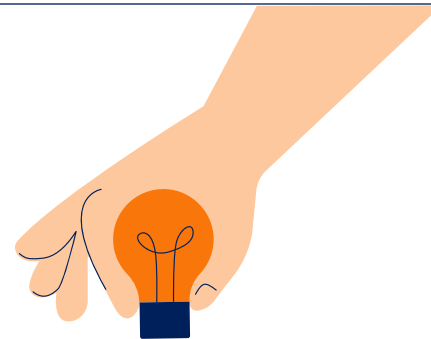

Why QBE? A market leader in construction insurance

QBE stands apart by offering a total suite of solutions that cover every phase of a construction project. From single project policies to third-party liability and delay in start-up (DSU) coverage, we structure integrated programs that provide seamless protection across the project lifecycle.

-  **Long-term stability:** Up to 10-year policies for consistency and cover beyond market norms.
-  **Technical leadership:** A trusted lead underwriter with expertise in structuring complex programs.
-  **Comprehensive protection:** Broad appetite and market leading policy wordings to reduce coverage gaps.
-  **Risk engineering excellence:** Proactive insights to mitigate risks before they arise.
-  **Proven claims support:** A dedicated regional team for fast, effective claims resolution.

With a strong track record and capacity, QBE is the natural lead insurer, delivering certainty and peace of mind to brokers and customers.

Our value proposition

Risk engineering and tailored insurance solutions

In addition to insurance solutions, QBE provides consultancy and risk engineering services to enhance project security and mitigate risks across all lifecycle stages. This proactive approach ensures our clients can focus on growth while we safeguard their projects.

Key challenges and QBE solutions

Climate risk, supply chain resilience, labour shortage mitigation.

Key challenges	QBE response
<p>Climate risk Climate change is transforming business risk. From rising seas levels to extreme weather, the impact on property, construction, and marine sectors is increasingly evident.</p>	<p>Building climate resilience into every policy QBE embeds climate resilience across our Property, Construction, and Marine products through tailored underwriting and risk engineering solutions.</p> <p>Our partnership with the IFC’s Building Resilience Index (BRI) supports climate-smart design, while initiatives like Premiums4Good and our net-zero commitments help customers build for the future, not just insure against it.</p>
<p>Supply chain disruptions Global instability, material shortages, and freight costs are driving construction delays and budget blowouts.</p>	<p>Protection at every stage QBE’s Marine Cargo and Contractors’ All-Risk (CAR) policies provide seamless protection for critical construction materials—covering transit, storage, and on-site phases to help keep projects moving with confidence.</p>
<p>Labour shortages and skills gaps Labour shortages driven by aging workforces, skills gaps, and reliance on migrant labour challenge project timelines and quality across Asia.</p>	<p>Workforce resilience Our worker-focused coverage helps safeguard people and maintain productivity, even in constrained labour environments.</p>

Enabling a more resilient future

At QBE, we’re **at the heart of it** - partnering with the construction industry to navigate risk and build resilience. Our purpose is to enable a more resilient future, and we do this by combining deep sector expertise with a genuine commitment to understanding what matters most to our customers.

Whether it’s climate risk, workforce challenges, or supply chain disruption, we deliver tailored solutions and proactive support that help our partners protect their projects and unlock long-term value. Together, we’re building stronger, safer, and more sustainable outcomes across Asia.
