

How can QBE play a part in your Cyber risk solutions

Overview of Cyber Essentials & Cyber Trust Marks

The Cyber Essentials and Cyber Trust marks are part of a cybersecurity certification programme for organisations. Developed by the Cyber Security Agency of Singapore (CSA), they serve as visible indicators to demonstrate that organisations have put in place good cybersecurity practices to protect their operations and customers against cyber attacks.

How can you protect your business?

Effective risk management is fundamental to protect your business. Adequate and up-to-date risk management controls to complement the Cyber Essentials and Cyber Trust marks are crucial for all businesses and provide considerable protection against malicious and unauthorised activities. However, breaches may still be unavoidable and when things go wrong, insurance policies provide extra security and protection.

QBE Cyber and Data Security (CDS) Insurance

QBE CDS solution provides protection against third party liability arising from unauthorised access to your systems. In addition, we also provide first party protection¹, which is supported by global and reputable cyber emergency service providers which QBE has partnered with to ensure a smooth and professional handling of cyber incidents and claims.
