

Cyber Vendor Partnerships

Partnerships. Not just policies.

QBE collaborates with a range of vendors to provide comprehensive solutions for diverse cybersecurity challenges. These vendor services include complimentary offerings, preferred pricing partnerships, and innovative products. QBE Cyber Services works closely with vendors, brokers and customers to ensure solutions are aligned with organisational needs.

The following solutions are available to QCyberProtect primary customers:

QCyberPrepare (powered by CYGNVS)

A secure document storage and communication platform for managing cyber incidents. Primary customers get complimentary access with personalised support from CYGNVS experts.

SentinelOne Singularity™ Platform

Advanced endpoint cybersecurity platform to detect, prevent, and respond to threats across devices, cloud platforms, and user identities.

Complimentary 60-day trial includes:

- Full setup and configuration support
- Optional scans of Active Directory and cloud assets
- Minimum 50% discount if purchased after the trial

Primary customers with a premium > \$35KUSD can choose one of these complimentary solutions each policy year:

Employee training and attack simulation

Organisations can choose employee training or attack simulations that target phishing, vishing, and smishing threats. These solutions reinforce best practices and enhance employee awareness.

Trusted partner: Arsen

Firewall configuration assessment

This assessment will address firewall misconfigurations, close security gaps, and strengthen controls to reduce risk and prevent attackers from gaining a foothold.

Trusted partner: Fenix24

Proactive M365 security assessment

This assessment uses proprietary technology, incident analysis, and threat intelligence to identify risks and offer recommendations to improve your security posture.

Trusted partner: Asceris

Active Directory configuration assessment

This exercise will identify and remediate active directory misconfigurations, close security gaps, and fortify controls to minimise risk and prevent unauthorised access.

Trusted partner: Fenix24

XDR configuration assessment

This assessment evaluates your platform (SentinelOne or CrowdStrike) and identifies misconfigurations that can leave vulnerabilities, addressing cyber threats across endpoints, networks and cloud platforms.

Trusted partner: Asceris

Ransomware Backup and Resiliency Assessment

Validates whether backups can withstand an attack and estimates realistic recovery timelines. The assessment continuously evolves to adapt to align with current threat actor tactics.

Trusted partner: Fenix24
