

Potential Catastrophic Loss List - ICD-10

Guidelines for identifying potential catastrophic losses

The specific diagnoses listed below are key trigger indications of potentially catastrophic losses. In addition, the following acute medical situations warrant close review and may require case management consultation.

- 1. Transplants liver, renal, heart, lung, pancreas, bone marrow and any combinations and transplant evaluation testing
- 2. Hospitalization of a covered person during the past 12 months including:
 - A length of stay request of seven (7) days or greater
 - Multiple (three or more hospitalizations)
 - Interim/cycle bills have been received
 - Billed charges exceed \$40,000
- 3. Request for transfer to a rehabilitation facility
- 4. Hyperalimentation (TPN)
- 5. Home IV antibiotic therapy > 4 week duration
- 6. Substance abuse/mental nervous > \$25,000
- 7. Specialty pharmacy drugs > \$25,000 per script

ICD-10 codes for disclosure notification

Please list all Plan Participants who have been diagnosed with or treated for any of the codes listed under the following categories during the current Benefit Period.
